

The Dashboard

The IGR Dashboard

The IGR Dashboard was launched by the 36 Governors of the federation on February 15th 2017, as a programme designed to facilitate the provision of technical assistance to States in the area of domestic financing.

The tool is designed as an online platform that assesses the tax/revenue environment of States; tracks the impact of reforms; and facilitates the replication of commendable practices across the 36 States of Nigeria – through evidence, peer learning and technical assistance.

Dashboard reports will be used as advocacy tools to drive strong political commitment from Governors to fast-track the implementation of IGR reforms.

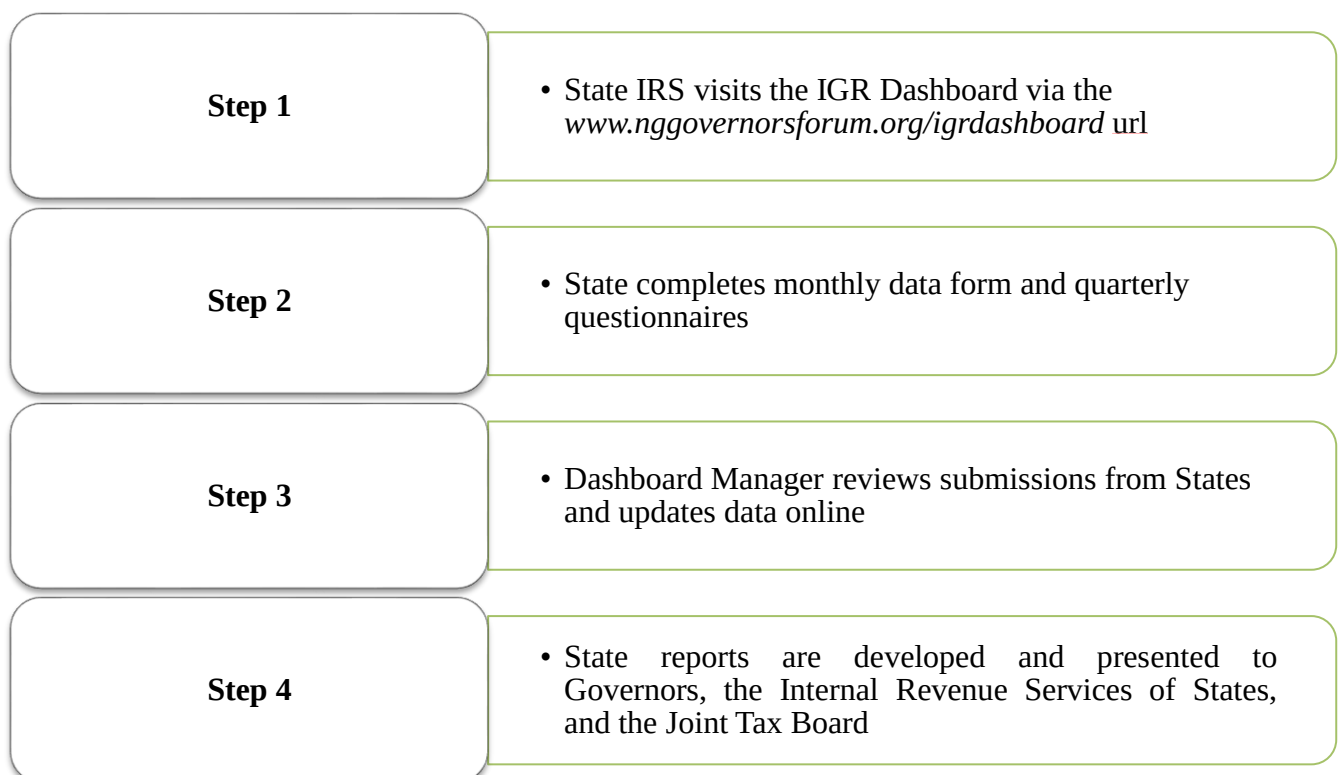

How it Works

The Dashboard provides real time access to all 36 States' Boards of Internal Revenue (SBIR) and maintains useful tax/revenue information, including the status of their regulatory and institutional arrangements, tax/revenue reforms tracking and IGR statistics.

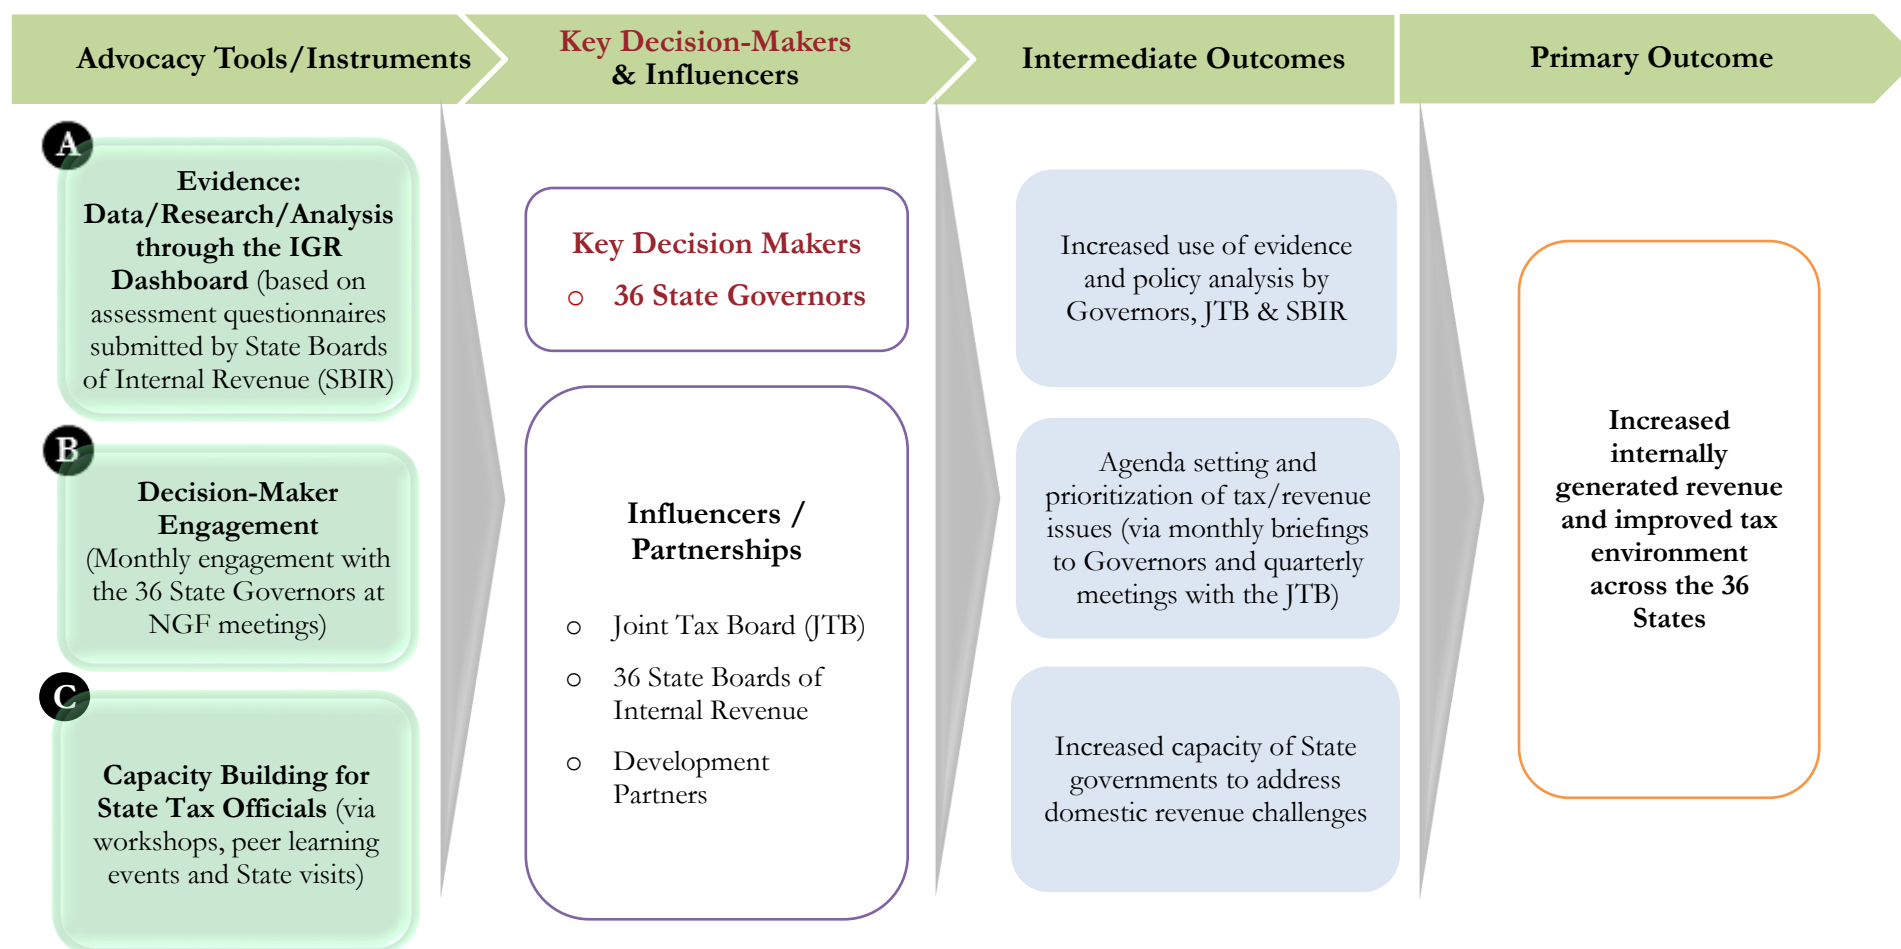

The NGF Secretariat drives the operation of the programme and supports the implementation and monitoring of recommended actions from the Dashboard, including those agreed at Joint Tax Board (JTB) meetings.

This will be achieved by ensuring high political support from Governors through monthly briefings at NGF meetings, while the JTB provides the learning platform for stimulating discussions with States' tax heads.
